Summary

A payment from the Plan that is eligible for “rollover” can be taken in two ways. You may have all or any portion of your payment either 1) paid in a “direct rollover,” OR 2) paid to you. A “rollover” is a payment of your Plan benefits to your Individual Retirement Arrangement (IRA) or to another qualified employer plan. This choice will affect the tax you owe.

If you choose a direct rollover

- Your payment will not be taxed in the current year and no income tax will be withheld.
- Your payment will be made payable directly to your IRA or, if you choose, to another qualified employer plan that accepts your rollover.
- Your payment will be taxed later when you take it out of the IRA or the employer plan.

If you choose to have your Plan benefits paid to you

- You will receive only 80% of the payment because the Plan Administrator is required to withhold 20% of the payment and send it to the IRS as income tax withholding to be credited against your taxes.
- Your payment will be taxed in the current year unless you roll it over. You may be able to use special tax rules that could reduce the tax you owe. However, if you receive the payment before age 59½, you also may have to pay an additional 10% tax which will be due to be paid by you at the end of the year in which you received your payment.
- You can roll over the payment to your IRA or to another employer plan that accepts your rollover within 60 days of receiving the payment. The amount rolled over will not be taxed until you take it out of the IRA or employment plan.
- If you want to roll over 100% of the payment to an IRA or a qualified employer plan, you must find other money to replace the 20% that was withheld. If you roll over only the 80% that you received, you will be taxed on the 20% that was withheld and that is not rolled over.

To take advantage of the rollover option, return the form to
